DETAILED ACTION

1. In view of the supplemental appeal brief filed on September 9, 2003,
PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Status of the Claims

2. Claims 1 and 3-10 are pending. Claims 2 and 11 have been cancelled.

Claim Objections

3. Claim 1 is objected to because of the following informalities: in line 4, the word "information-on" should be "information. Appropriate correction is required.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1 and 3-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 3-10 of U.S. Patent No. 5,790,785. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both disclose storing or manually inputting registration information related to the user on a first node, storing said registration information on a second node, providing the user with a user identification code permitting access to said registration information, and supplying said user identification code and said registration information to at least one requested node.

6. Claims 1 and 10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 10/411,829. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both disclose providing registration information related to the user to a first node and a second node, providing a user identification code related said registration information, and supplying said user identification code and said registration information to at least one requested node.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
